WIRELESS ACCESSORIES

32

2-button 4-button

REMOTE

Available in 2 or 4-button model. Each Ziggy Remote button can be set to different gate actions. Eg. open or close, pedestrian access (slightly open), open-stay open. It can even operate garage doors. Ask your installer for more info.

WIRELESS KEYPAD

Keypads allow visitors, or family members without a remote, to open the gate using a secret access code.

Because it's wireless this keypad can be installed anywhere near the gate, even out-of-sight. It can also operate your garage door.

WALL MOUNT

Ziggy Wall holds a remote anywhere around the home or garage. The neat, compact design is compatible with all Ziggy remotes.
